# The Ultimate Remote Monitoring Solution

Galooli has been leading the smart revolution of energy efficiency for over a decade, with a business presence spanning the globe. We provide an agnostic, all-encompassing remote monitoring and management platform to track, analyze, and optimize your remote site and energy asset performance. Monitor any type of remote site with our comprehensive suite of tools, including the enhanced accessibility of our Mobile App. With Galooli, it's easier than ever to maximize the efficiency of your site power supply and ensure uninterrupted uptime, reduced overhead, increased sustainability, and more.

## Visibility and control Anywhere, anytime

**Real-time visibility:** Replace costly site visits with access to up-to-date status reports on all connected assets.

**Continuous data stream:** Minute-by-minute access to asset and site performance data ensures the continuity and reliability of the information we collect.

**Remote control:** Preserve energy assets operations and improve efficiency via remote configuration and control tools.

**Comprehensive reports:** In-depth site summaries that provide actionable insights that help optimize energy asset performance and operations.

**Asset protection:** Track location and consumption patterns of energy assets to secure unsupervised sites and equipment.

## Empowering the world's largest companies
